model 9800

**Wayne  
Dalton**

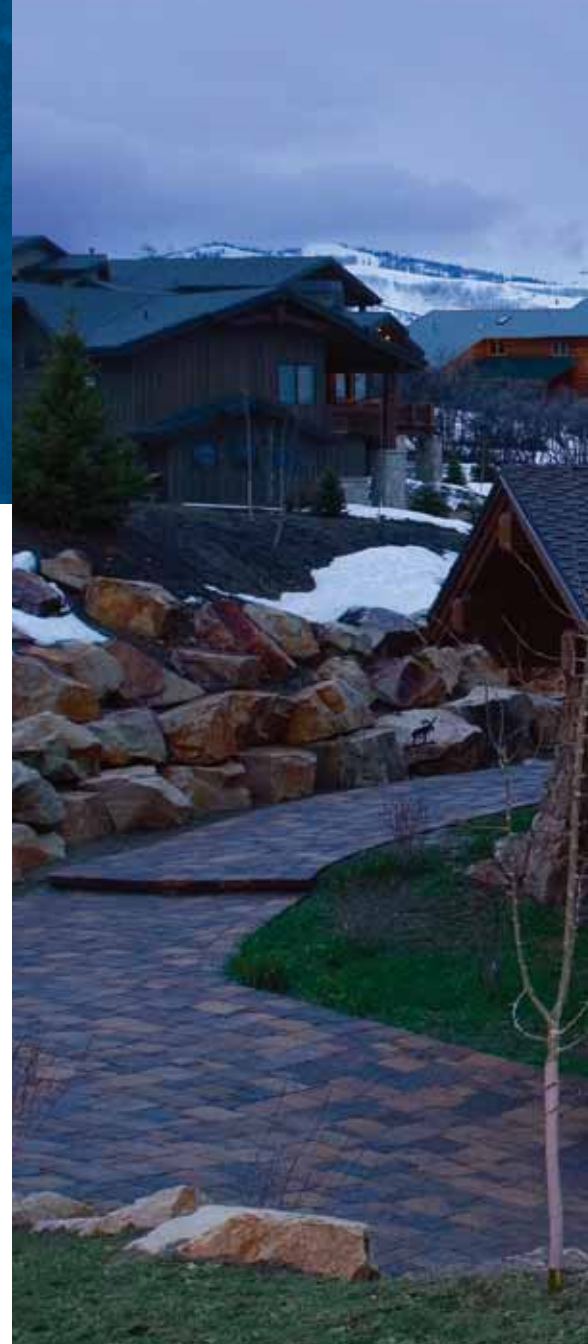

see

This could be the most beautiful wood garage door you've ever seen. Except it's not wood.

Model 9800 has been magnificently engineered by Wayne-Dalton. With an artfully molded fiberglass surface concealing durable steel construction. The high-definition graining will astound your eye.

On the cover, the 7' high vertical panels of Model 9800 mirror the detailing of this brilliant coastal-region home. The fiberglass surface, shown in Oak, withstands sun and salt air with virtually no maintenance. Available with windload-rated structural reinforcements beginning in 2007.

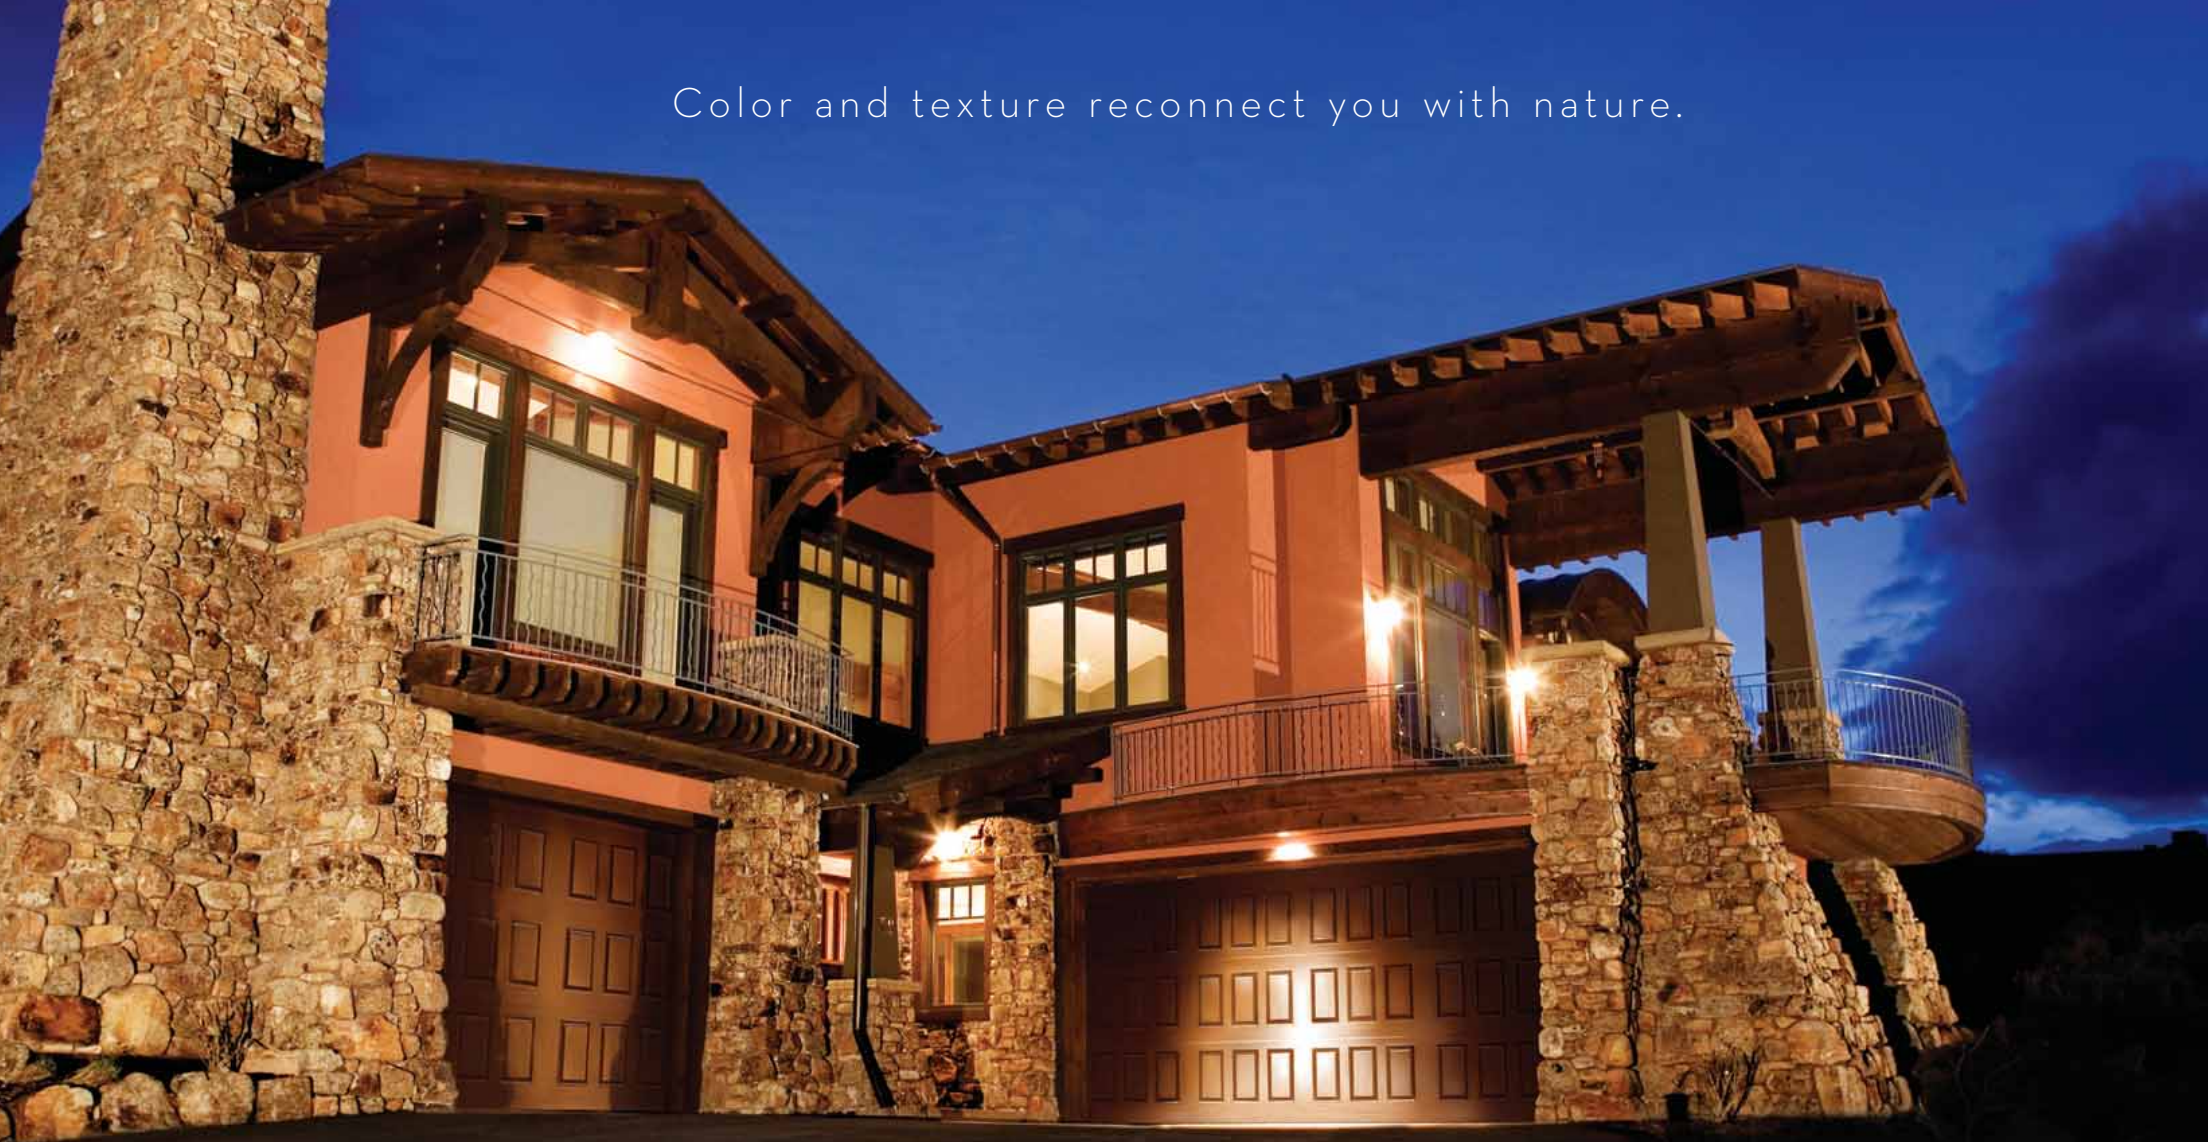

The view amazes. Almost heaven.

The open grain feel of Model 9800 is sculpted in fiberglass with uncanny fidelity. Shown here with 7" high horizontal panels in Mahogany, it can handle the harshest winters and brutal summers with style. Featuring Double Diamond Radiance™ windows.

Color and texture reconnect you with nature.

The natural stone and wood architectural elements of this Mission home are complemented by 7' high vertical panels of Model 9800 in Walnut.

touch

## How does it make you feel?

Even this close, they'll never know it's not genuine hardwood.  
Go ahead - touch it. The rich wood graining flows through your  
fingertips. In colors recalling the shades of a deep woods trail.

# believe

This page, Model 9800 shown in Mahogany.  
On the back cover, Model 9800 makes the garage doors a natural part  
of the architecture – not an afterthought. The 7' high vertical panels  
in Oak blend seamlessly with this mountain lookout home.

## This is the best of both worlds.

Bring on the wind, rain, driveway soccer practice, the years. The surface of Model 9800 won't warp, crack or rot like wood. Won't dent or ding like steel can.

### It begins with safety. Of course.

Made with award-winning safety technology including sealed counterbalance, pinch-resistant door panels and tamper-resistant mounting brackets.

### Built for your inner-accountant.

Foamed-in-place R-7.3 insulation helps control costly heat loss and gain. An acoustic break helps block street noise. With 360° weather sealing to stop air infiltration.

### Detailing is refined.

Three-section styling on 7' high doors give a custom design look. Our 8' doors have four-section styling. All panels have finished interiors with color-matched, low-profile hinges.
